Plasterboard Sustainability Initiative (PSP – UK)

CV – MR. Malcolm Waddell

Malcolm Waddell
Construction Project Manager
WRAP

Malcolm is working across construction product sectors to support the development of improved resource efficiency. He is WRAP's lead on various product resource efficiency action plans such as plasterboard, timber, clay bricks & blocks, precast concrete, windows, ceiling tiles and rigid insulation. Malcolm also leads on areas such as logistics, manufacture resource efficiency reviews and the recycled gypsum PAS and QP reviews. Malcolm joined WRAP in May 2007 and delivered key projects on the Plasterboard Programme, such as on developing end uses for recycled gypsum, collection logistics and projects on waste reduction and more effective waste management.

His background involved working in logistics where he worked as a National Operations Manager for a major retailer's returns process and as a business development manager.
